1. GEMS Project: [Yearly average 2022-2023]

The Board assists the CPCB (Central Pollution Control Board) in implementing the GEMS (Global Environmental Monitoring System) project since 1980. The scope of this project includes an assessment of the quality of water of the major rivers of the State, viz. Narmada, Tapi, Mahi and Sabarmati.

As per the guidelines of the CPCB, 09 stations have been fixed, out of which 7 are for monitoring the quality of surface water and the rest for monitoring of ground water quality. The monitoring results under this project are submitted to the CPCB, New Delhi through the EDB system.

Sr. No.	Water Body	Location	Parameters *			
			pH	DO	BOD	COD
1.	Sabarmati	Vasna - Narol Bridge	7.28	1.73	48.18	182.33

8.	Tapi	River Tapi at Kathor at N.H.8	8.22	7.14	0.94	7.75
9.	Well	Well At-Kamatibaug BARODA, GUJARAT	7.70	3.8	0.8	15.0

*Except pH, all the parameters are expressed as mg/L.

2. MINARS Project: [Yearly average 2022-2023]

On account of various discharge of wastewater in river, the quality is likely to be adversely affected. It is therefore, necessary to monitor the quality of the various river water. This is a continuous project of previous years as approved by the CPCB and known as MINARS (Monitoring of Indian National Aquatic Resources System) Project.

The Board is monitoring the water quality from 152 sampling station located on various rivers in the State. These rivers include Sabarmati, Meshwo, Anas, Mahi, Panam, Narmada, Damanganga, Kolak, Par, Tapi, Ambica etc. Under this project groundwater quality and lake water quality are also monitored periodically.

The ground water quality monitoring stations are located at Ahmedabad, Vadodara, Bhavnagar, Amreli, Junagadh, Rajkot, Surendranagar, Jamnagar, Bhuj, Palanpur, Mehsana, Siddhpur, Himmatnagar, Nadiad, Dahod, Godhra, Ankleshwar, Surat, Hazira, Valsad, and Vapi. The sampling stations included under the lake water quality project are located at Kankaria lake and Chandola lake in Ahmedabad; Ajwa lake and Sursagar lake in Vadodara, Nal Sarovar, Bindu, Sarovar, Sahashtraling Sarover, Lakhotalake, Narshinh Mehta Sarovar, Nadiad lake, Ranjitsagar talav – Halol, Thol tank.

6. Bio monitoring of water bodies

Central Pollution Control Board has initiated studies on Water Quality Management under provision of the Water (Prevention & Control of Pollution) Act, 1974. The Biological Monitoring system has been well established & emphasized as one of the cost effective system in order to maintain & restore the wholesomeness of water in terms of various designated best uses of Water Bodies.

Criteria for Biological Water Quality Evaluation

Water Quality Class	Range of Saprobic Score	Range of Diversity Score	Water Quality	Indicator colour
A	7 and more	0.2-1	Clean	Blue

B	6-7	0.5-1	Slight Pollution	Light Blue
C	3-6	0.3-0.9	Moderate Pollution	Green
D	2-5	0.4 & less	Heavy Pollution	Orange
E	0-2	0-0.2	Severe Pollution	Red

Central Pollution Control Board, Delhi. Under National Water Quality Monitoring Programme (NWMP), Bio-Monitoring station are to be Monitored three times in a year at pre selected locations, Physico-Chemical analysis along with Bio-Monitoring of rivers/ Lakes stretches. Such Way Up gradation of Rivers/Lakes for best designated use to humankind will be taken up.

Details of number of samples collected under Bio-monitoring Project during the year 2022-2023 from Dam, Lake, and River and Estuarine water/Sea are as under.

Sr. No.	Sampling Location/Stations	Month	Water Quality Class	Range of Saprobic Score	Range of Diversity Score	Water Quality	Indicator Colour
1.	River Sabarmati at Hansol Bridge, Ahemdaad	Dec	B	6.8	0.69	Slight Pollution	Light Blue
